

ANIL M

AWS Cloud Engineer | Amazon Connect Specialist | Solutions Architect

Bangalore, India

 +91 8310270245 |  anilmanjunath.inbox@gmail.com

PROFESSIONAL SUMMARY

AWS Cloud & Amazon Connect Engineer with **6+ years of experience** in designing scalable contact center solutions, **serverless applications, and AI-driven automation**. Proven expertise in **Amazon Connect, AWS services, and GenAI integrations**, with hands-on experience in building **web applications, intelligent virtual agents, and real-time communication solutions like Click-to-Call**. Strong track record of **improving customer experience, automating workflows, and delivering secure, high-performance cloud solutions**.

CORE SKILLS

Cloud & AWS:

Amazon Connect, Lambda, API Gateway, DynamoDB, S3, CloudFront, IAM, Cognito, AWS Config, WorkSpaces, Kinesis, SES

Programming & Web:

Python, JavaScript, Node.js, HTML, CSS, Bootstrap

AI & Automation:

GenAI integrations, AI-based incident creation, Call Summarization, Smart Filtering

DevOps & Tools:

CloudFormation (YAML/JSON), Git, Postman, CI/CD basics

Testing:

Selenium WebDriver, TestNG, API Testing, Automation & Manual Testing

Other:

System Design, Troubleshooting, Documentation, Architecture Diagrams

PROFESSIONAL EXPERIENCE

HEXAWARE TECHNOLOGIES – Bengaluru

Deputy Technical Specialist | AWS Connect

Aug 2025 – Present

- Designed and enforced **cloud compliance frameworks** using AWS Config, proactively identifying and resolving security gaps.
 - Led **SSO migration for Amazon Connect**, improving identity governance and enterprise-level access control.
 - Built **serverless automation solutions** using AWS Lambda for integrations, workflows, and security remediation.
 - Developed **GenAI-powered post-call summarization**, reducing agent handling time and improving productivity.
 - Managed and deployed **Amazon WorkSpaces environments** for secure, scalable agent operations.
 - Developed **6+ production-grade web applications** using AWS (S3, CloudFront, API Gateway, Lambda, DynamoDB) to deliver **custom dashboards and operational tools**.
 - Designed a **Click-to-Call solution (WebRTC-based)** enabling voice connectivity over the internet without requiring phone numbers; deployable across **web platforms, Microsoft Teams, and enterprise apps**.
 - Built an **AI-powered incident automation system** that captures customer issues and automatically creates tickets when agents are unavailable, ensuring continuous support.
 - Resolved **call quality and connectivity issues** using CloudWatch logs, metrics, and flow-level debugging.
 - Implemented **intelligent spam filtering**, reducing invalid interactions and improving system reliability.
 - Produced **technical documentation and architecture diagrams** to support audits and long-term maintainability.
-

CAPGEMINI – Bengaluru

Amazon Connect Developer

Mar 2025 – Aug 2025

- Built and configured **Amazon Connect components** including Contact Flows, Routing Profiles, Queues, and Security Profiles.
 - Diagnosed and resolved **production issues across AWS services**, ensuring stability and uptime.
 - Supported **live contact center environments**, optimizing performance and reliability.
-

WIPRO – Bengaluru

Amazon Connect Developer

Feb 2020 – Feb 2025

- Designed and delivered **10+ enterprise contact center solutions** with integrations to Salesforce, ServiceNow, and WFM systems.
 - Implemented advanced features including **Voicemail, Callbacks, Surveys, Custom CCP, and chatbots (Amazon Lex)**.
 - Developed **serverless architectures** using Lambda, DynamoDB, API Gateway, CloudFront, and Kinesis.
 - Worked extensively with **Contact Lens, Streams API, and Connect APIs**.
 - Conducted **training sessions for agents and stakeholders**.
 - Created **VISIO diagrams and technical documentation** aligned with business requirements.
-

WIPRO – Bengaluru

Test Engineer

Jul 2019 – Feb 2020

- Designed and executed **test plans and automation frameworks** using Selenium WebDriver and TestNG and Performed **regression, API, and UAT testing**.
 - Improved release efficiency through **test automation and process optimization**.
-

KEY PROJECTS

AI Incident Automation System

- Built an AI-based solution that **automatically converts customer issue descriptions into incidents**, ensuring uninterrupted support during agent unavailability.

Click-to-Call (WebRTC Solution)

- Developed a **numberless calling solution** using internet-based connectivity, deployable across websites, Teams, and enterprise apps.

GenAI Call Summarization

- Implemented **AI-driven call summaries**, reducing manual effort and improving agent productivity.

AWS Dashboard Applications (6+)

- Created scalable dashboards for **monitoring, analytics, and operations**, improving visibility and decision-making.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate

EDUCATION

Birla Institute of Technology and Science, Pilani

M.Tech – Computing Systems and Infrastructure (2019 – 2023)

NRI Institute, Bangalore

Bachelor of Computer Applications (2016 – 2019)
